- (a) is the same as, or substantially similar to, but no more onerous than

- the committee may issue a warning of withdrawal of education program recognition, notifying the educational institution that recognition of the education program may be withdrawn if terms and conditions specified in the warning are not met within the time specified in the warning.
- (2) Before the education program review committee decides whether to withdraw recognition of an education program identified in a warning issued under subsection (1), the educational institution must be given a reasonable opportunity to provide information or submissions in response to any concerns identified in the warning for the committee's consideration, and to demonstrate satisfactory resolution of any deficiencies identified in the warning.
- (3) After considering any information or submissions provided by the educational institution under subsection (2), the education program review committee may decide

Equivalency evaluators

- 6-12 The licence committee must appoint evaluators for the purpose of conducting equivalency determinations under section 6-13.

Equivalency determinations

- 6-13 (1) The registrar or the licence committee may require an applicant to undergo an equivalency determination under this section
- (a) if the applicant is not entitled to licensure under section 6-5 and does not otherwise meet applicable eligibility standards because the applicant
 - (i) completed an education program outside Canada that is not recognized under section 6-6,
 - (ii) is applying to the college for initial licensure as a practising LPN licensee, a practising RPN licensee or a practising RN licensee more than five years after their completion of an education program recognized for that purpose under section 6-6 or deemed to be equivalent under section 6-11, or

- (3) An applicant who is required to undergo an equivalency determination must provide any information and records requested or ordered by the registrar to enable an evaluator to determine if the applicant's knowledge, skills, ability and judgment are substantially equivalent to those expected of a new graduate of an education program recognized under section 6-6, having regard to the entry-level competencies and eligibility standards required by the college for the applicable class of licensees.
- (4) When undertaking an equivalency determination, an evaluator
- (a) must consider the applicant's credentials collectively and cumulatively, including
 - (i) any extrajurisdictional credentials held by the applicant,
 - (ii) the applicant's past or current licensure or registration to practise the profession in any jurisdiction, including any limitations or conditions imposed on the applicant's authorization to practise in any jurisdiction, and
 - (iii) any relevant evidence provided or caused to be provided by the applicant of professional experience acquired inside or outside Canada, including evidence of the nature, scope and currency of that professional experience and any gaps in practice, and
 - (b) may require the applicant to do any of the following:

- (i) to undergo an assessment of their knowledge, skills, ability and judgment by Inspire Global Assessments or another similar body or organization recognized by the licence committee for the purpose of this section;

 - (ii) the education program meets the applicable education standards and indicators of the college, and
 - (iii) graduates of the education program are adequately prepared to safely, ethically and competently practise the profession in a Canadian health care setting.
- (6) An evaluator who conducts an equivalency determination of an applicant's knowledge, skills, ability and judgment must notify the applicant of the outcome of the equivalency determination, including

to address any apparent deficiencies or gaps in the applicant's knowledge, skills, ability and judgment.

- (7) If an evaluator concludes that an applicant has failed to establish that their knowledge, skills, ability and judgment are substantially equivalent to those expected of a new graduate of an education program recognized under section 6-6, the applicant must elect either

- (9) If applicant applies under subsection (8) for reconsideration of their equivalency determination, the licence committee
 - (a) must give the applicant an opportunity to be heard under section 53(1) of the Act by inviting them to provide written submissions under section 380(2)(a) of the Act, and
 - (b) may accept, reject or vary the outcome of the equivalency determination, including any transitional education or experience identified by the evaluator, based on the committee's review of
 - (i) the information and records considered by the evaluator under this section,

- (a) the licence committee must notify each applicant who takes the examination, in writing and as soon as reasonably practicable, of their examination result,

- (b) an applicant who fails the examination on their first attempt may take it a second time, and if they fail again on their second attempt, they may take it a third time, and
 - (c) an applicant who fails a required examination three or more times is not eligible to take it again, unless the licence committee is satisfied that there are special circumstances warranting another attempt.

Recognition of certified practice courses

- 7-4
- (1) The education program review committee may, in accordance with this section and any applicable education program review committee policies or procedures under section 7-6, grant or renew recognition for certified practice courses offered by specific course providers for the purpose of each certification program established under section 7-2.
 - (2) Subject to any applicable education program review committee policies or procedures under section 7-6, a course provider may apply to the college for recognition of a new certified practice course, or for renewal of recognition of an established certified practice course, by providing a completed application to the registrar in the form required by the college.
 - (3) A course provider that applies for recognition of a new certified practice course, or for renewal of recognition for an established certified practice course, must provide a report to the registrar in the form required by the college, and any additional information required by the education program review committee or the registrar, to confirm that the course will satisfy the requirements of subsection (5)(a), (b) and (c).
 - (4) In addition to the report and any other information provided by a course provider under subsection (3), the education program review committee or the registrar may require the course provider to provide supplementary information or to undergo and cooperate with a site visit by one or more site visitors appointed by the registrar, to provide additional evidence to confirm that the course provider's certified practice course will satisfy the requirements of subsection (5)(a), (b) and (c).
 - (5) Subject to subsections (6) and (7), the education program review committee may grant or renew recognition of a certified practice course under subsection (1) for a specified period of time, subject to any terms or conditions specified by the committee, if the committee is satisfied that the certified practice course

 - (b) will prepare or continue to prepare eligible licensees to achieve the applicable certified practice competencies, and
 - (c) will satisfy any other terms or conditions previously imposed by the committee.

- (6) The education program review committee must determine the period of recognition granted to a certified practice course under subsection (5) in the exercise of its discretion, having regard to any relevant factors described in applicable education program review committee policies or procedures under section 7-6, provided that the period of recognition granted to a new certified practice course or to an established certified practice course whose recognition is renewed must not exceed three years.
- (7) At the request of a course provider applying for renewal of recognition of an established certified practice course, the education program review committee or the registrar may extend the existing recognition of the certified practice course on a provisional basis for a period of up to one year, subject to any terms or conditions that the committee considers necessary or appropriate to protect the public, if the committee is satisfied that, as a result of extenuating circumstances, it is in the public interest to grant that extension to give the course provider additional time to provide information confirming that the certified practice course will satisfy the requirements of subsection (5)(a), (b) and (c).
- (8) If a course provider does not provide sufficient information to satisfy the education program review committee that a certified practice course will satisfy the requirements of subsection (5)(a), (b) and (c), the committee
 - (a) must assess the risk to the public of granting or renewing recognition to the certified practice course, and
 - (b) having regard to that risk assessment, may
 - (i) grant or renew recognition for the certified practice course for a specified period of time that is shorter than the maximum period of recognition under subsection (6), having regard to any relevant factors described in applicable education program review committee policies or procedures under section 7-6, subject to any terms or conditions that the committee considers necessary or appropriate to protect the public, or

- (11) If, having regard to any information provided by a course provider under subsection (9), the education program review committee determines that a substantially changed certified practice course may no longer satisfy the requirements of subsection (5)(a), (b) and (c), the committee may
 - (a) modify any existing terms or conditions imposed on the certified practice course, or add additional terms or conditions that the committee considers necessary or appropriate, including a term or condition prohibiting the course provider from making any substantial change to the certified practice course, or
 - (b) reduce the existing period of recognition for the certified practice course, with or without any changes to terms or conditions under paragraph (a).

Withdrawal of certified practice course recognition

- 7-5 (1) At any time, if the education program review committee determines that the continued recognition of a course provider's certified practice course granted recognition under section 7-4 poses a risk to the public, because of
- (a) the course provider's failure to comply with terms or conditions previously imposed by the committee,
 - (b) any substantial change to the certified practice course, or
 - (c) any other deficiencies identified by the committee,
- the committee may issue a warning of withdrawal of certified practice course recognition, notifying the course provider that recognition of the certified practice

course may be withdrawn if terms and conditions specified in the warning are not met within the time specified in the warning.

- (2) Before the education program review committee decides whether to withdraw recognition of a certified practice course identified in a warning issued under subsection (1), the course provider must be given a reasonable opportunity to provide information or submissions in response to any concerns identified in the warning for the committee's consideration, and to demonstrate satisfactory resolution of any deficiencies identified in the warning.
- (3) After considering any information or submissions provided by the course provider under subsection (2), the education program review committee may decide
 - (a) to continue the existing recognition of the certified practice course without modification,
 - (b) to modify any existing terms or conditions imposed on the certified practice course, or add additional terms or conditions that the committee considers necessary or appropriate,
 - (c) to reduce the existing period of recognition for the certified practice course, with or without any changes to terms or conditions under paragraph (b), or

- (a) whether there is a *prima facie* case that the respondent lacks competence or has committed an act of misconduct, having regard to

Considerations for requesting or cancelling citation

- 12-32 (1) Without limiting the investigation committee's discretion under sections 136(2)(b) and 138(2)(b) of the Act, the committee may consider the following factors when determining whether to direct the registrar to request that the director of discipline issue or cancel a citation, or whether to agree to a disciplinary order that will result in a request to cancel a citation under section 139(1)(b) of the Act:

- (c) any other factors relevant to the circumstances the director of discipline is required to consider before issuing a citation under section 162(1) of the Act or before cancelling a citation under section 167(1) of the Act.

- (3) No provision in this section may be construed as waiving any legal advice privilege that applies to communications between a legal professional and the college, including the college's registrar, the investigation committee or anyone else acting on the college's behalf.

the investigation committee may direct the registrar to deliver a written request to the Federal Minister for issuance of a notice in respect of the nurse practitioner or midwife.

- (3) The investigation committee may authorize the registrar to provide a consent to retraction of a notice if
- (a) the investigation committee is satisfied that the consent to retraction is not contrary to the public interest, and
 - (b) the consent to retraction is not inconsistent with any other limits or conditions imposed on the nurse practitioner’s or midwife’s practice under the Act.
- (4) The registrar must not issue a consent to retraction except in accordance with subsection (3).
